REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

None of the prior art of record shows or renders obvious the robot of claims 1, 4 and 5, specifically;

Claim 1 requires a pair of end-to-end torsional rigid bushings are arranged in a stationary manner on the outer tube in which the inner axle is mounted to be displaceable, confronting inner ends of the bushings being slightly spaced apart to define an annular gap forming a transversely extending lubrication pocket for continuous lubrication of the inner axle during movement relative to the bushings.

Claim 4 requires that the telescopic axle comprises an inner axle and an outer tube arranged on the inner axle and displaceable in a longitudinal direction, arranging a pair of end-to-end torsional rigid bushings in a stationary manner on the outer tube in which the inner axle is mounted to be displaceable, spacing the confronting inner ends of the bushings apart to define an annular gap forming a transversely extending lubrication pocket, and continuously lubricating the inner axle through the pocket during movement relative to the bushings.

Claim 5 requires a pair of end-to-end torsional rigid bushings being arranged in a stationary manner on the outer tube in which the inner axle is mounted to be displaceable, the bushings being spaced apart at confronting inner ends to form a transversely extending lubrication pocket for continuous lubrication of the inner axle during movement relative to the bushings, the bushings and a guiding device being

Application/Control Number: 10/700,057

Art Unit: 3682

firmly attached on the inner axle at an end opposite the end section thereof such that part of the guiding device is arranged to abut the inside of the outer tube.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David M. Fenstermacher whose telephone number is 571-272-7102. The examiner can normally be reached on 10:30-7:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Richard Ridley can be reached on 571-272-6917. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
